

To,
Bachpan Care Organization

Date: 29/07/2026

Name of the Patient: Baby of Muskan

Age: 1 day

Gender: Female

Medical Diagnosis: Acute sepsis, Respiratory Distress, Prematurity with Low Birth Weight

Suggested Treatment: Prolonged NICU management with ventilatory and respiratory support for 3-weeks along with antibiotics and supportive care.

Proposed date of Treatment: As Soon As possible

Suggested Medical Treatment:

- NICU admission and continuous monitoring
- Mechanical ventilatory support / CPAP as required
- Broad spectrum IV antibiotics as per culture sensitivity
- IV fluids and inotropic support as required
- Nutritional support (TPN/Enteral feeding)
- Blood product / transfusion support as required
- Regular Monitoring (CBC, CRP, ABG, Electrolytes, etc.)
- Supportive care and management of complications

This is to certify that the above referred case is critically ill. The child requires support for medical treatment expenses. We hereby recommend this case for financial assistance. The above-mentioned estimate is an approximation for surgery/treatment and in the event of any complications the expenses may exceed the estimated cost.

Estimated cost of treatment: Rs 635000/-

Thank You

|-----------|-----------------|-------|--------------------------------|

Pathology

C-Reactive Protein, Crp

|                                |     |      |      |
|--------------------------------|-----|------|------|
| C-Reactive Protein; CRP, SERUM | 1.2 | mg/L | < 10 |
|--------------------------------|-----|------|------|

Method : Serum, Nephelometry)

Interpretation :

1. Measurement of CRP is useful for the detection and evaluation of infection, tissue injury, inflammatory disorders and associated diseases.
2. High sensitivity CRP (hsCRP) measurements may be used as an independent risk marker for the identification of individual at risk for future cardiovascular disease.
3. Increase in CRP values are non-Specific and should not be interpreted without a complete history.

### Comments :

The complete blood count (CBC) is a group of tests that evaluate the cells that circulate in blood, including red blood cells (RBCs), white blood cells (WBCs), and platelets (PLTs). The CBC can evaluate your overall health and detect a variety of diseases and conditions, such as infections, anemia and leukemia.
